

Appl. No. 10/812,688
Amdt. Dated April 5, 2007
Reply to Office action of January 17, 2007

Amendments to the Drawings:

The attached sheet of drawings includes changes to Fig. 7.

Attachment: 1 Replacement Sheet

REMARKS/ARGUMENTS

In response to the Examiner's Office Action of January 17, 2007, Applicants are providing the following remarks and considerations.

As requested by the Examiner the title of the invention has now been changed to more clearly indicate the substance of the configuration.

Additionally, changes and minor clarifications have been made to the specification in addition to a replacement page for Fig. 7 to indicate some minor corrections where items marked Delta I should have been marked as Delta D.

The Examiner has indicated that claims 7 – 10 and 12 – 15 would be allowable if rewritten in independent form to include all the limitations of the base claim and any intervening claims. As a result, Applicant has now amended the base claim 5 to include the substance of claims 7 and on which claims 8 – 10 have been amended to depend on the new reformulated claim 5.

Then the base claim 12 has now been amended to include former claim 13 while the claims 14 and 15 remain as originally provided except they are now dependent on a newly-amended base claim.

With the amendments to the title, the specification, the drawing of Fig. 7 and the claims it should now be seen that this application is in proper format and the claims have been properly combined.

Applicants appreciate the Examiner's comments and allowance of the claims 5, 8, 9, 10, 12 – 15 which have now been rewritten to depend on a base claim in each case.

It is now requested that Examiner provide a timely Notice of Allowance for the extant claims.
